This night heckle was performed with two two plane sections, one orbiting while the other was making their bombing run. Each section made three runs, dropping 2 incendiary clusters on each run. The runs were made at altitudes of from 7 to 9 thousand feet. The clusters made very satisfactory fires on the ground, and on one run, during which three accurate searchlights were employed, one of the clusters fell directly around a light which went out immediately and was not seen to be used again during subsequent runs, while the remaining lights were still employed. It is thought that this light was put out of commission by the cluster. The fires in the town covered most of the area of the town itself and a cluster falling on the NW end of the strip caused 2 small orange colored explosions which are thought to be possible fuel drums. Four clusters fell in the water immediately off shore close to the town. The planes returned to base without incident.
