The planes on this days attacks came in across the north and south ends of Mane Island to begin their runs. Nusalemon, Mane, Globio and Neusen Islands were struck by the 1000 pounders. The bomb that was dropped on Nausen Island skipped when it hit the ground and fell into the water at the edge of the reef. As the planes flew from Island to Island possible enemy installations were strafed. One plane returned to base with its bombs as they could not be dropped during the runs. Upon examination of the bombing controls it was found that the bombardiers handle had been left in the "Racks Locked" position. This bombardier had not flown in "D" model airplanes before and was not thoroughly familiar with the system. During both the strafing and bombing runs, no targets of particular interest were noted and the planes returned without having met AA fire from any of the islands.
